1 - To inquire whether a particular phone model has been certified with a particular platform, please contact your Polycom sales representative.

2 - MGCP and SIP models.

3- HD Voice means HD Point to Point connectivity is supported within a single business (assumes private WAN connections between sites if IP PBX is used).

4- HD Voice requires Polycom HD Endpoints and an HD-aware call server (does not interfere with SIP/SDP negotiation of wideband codec).

5 - Supported in R13 and later.

6 - Supported on AOS 15.1 and greater and AOS A1.01 and greater

7 - Included in the AA50 since version 1.1.0.1. Included in Asterisk Business Edition since version C.1.0. Switchvox products in V4.0

8 - Objectworld UC Server™ (SIP and CEBP Editions) version 4.4.0 and later will support the SoundPoint IP 550, 560, 650, 670 and the SoundStation IP 6000, and 7000.

9 - Supported in V3.0

10 - Supported in the Egg Rock release and later

11 - Supported in SIP@Net 4.2

12 - Supported in Polycom SIP 3.2.2 release
